Applicant										
SERVICES PETROLIERS SCHLUMBERGER										
The applicant is hereby notified that the international search report and the written opinion of the International Searching Authority have been established and are transmitted herewith. Filing of amendments and statement under Article 19: The applicant is entitled, if he so wishes, to amend the claims of the International Application (see Rule 46): When? The time limit for filing such amendments is normally 2 months from the date of transmittal of the International Search Report; however, for more details, see the notes on the accompanying sheet.										
Where? Directly to the International Bureau of WIPO, 34 chemin des Colombettes 1211 Geneva 20, Switzerland, Fascimile No.: (41–22) 740.14.35 For more detailed instructions, see the notes on the accompanying sheet.										
 The applicant is hereby notified that no international search report will be established and that the declaration under Article 17(2)(a) to that effect and the written opinion of the International Searching Authority are transmitted herewith. With regard to the protest against payment of (an) additional fee(s) under Rule 40.2, the applicant is notified that: 										
the protest together with the decision thereon has been transmitted to the International Bureau together with the applicant's request to forward the texts of both the protest and the decision thereon to the designated Offices. no decision has been made yet on the protest; the applicant will be notified as soon as a decision is made.							rith the			
4. Reminders Shortly after the expiration of 18 months from the priority date, the international application will be published by the International Bureau. If the applicant wishes to avoid or postpone publication, a notice of withdrawal of the international application, or of the priority claim, must reach the International Bureau as provided in Rules 90bis.1 and 90bis.3, respectively, before the completion of the technical preparations for international publication. The applicant may submit comments on an informal basis on the witten opinion of the International Searching Authority to the International Russey. The leterational Russey will exact a supplication of the International Searching Authority to the										
International Bureau. The International Bureau will send a copy of such comments to all designated Offices unless an international preliminary examination report has been or is to be established. These comments would also be made available to the public but not before the expiration of 30 months from the priority date.										
Within 19 months from the priority date, but only in respect of some designated Offices, a demand for international preliminary examination must be filed if the applicant wishes to postpone the entry into the national phase until 30 months from the priority date (in some Offices even later); otherwise, the applicant must, within 20 months from the priority date, perform the prescribed acts for entry into the national phase before those designated Offices.										
In respect of other designated Offices, the time limit of 30 months (or later) will apply even if no demand is filed within 19 months.										
See the Annex to Form PCT/IB/301 and, for details about the applicable time limits, Office by Office, see the <i>PCT Applicant's Guide</i> , Volume II, National Chapters and the WIPO Internet site.

NOTES TO FORM PCT/ISA/220

These Notes are intended to give the basic instructions concerning the filing of amendments under article 19. The Notes are based on the requirements of the Patent Cooperation Treaty, the Regulations and the Administrative Instructions under that Treaty. In case of discrepancy between these Notes and those requirements, the latter are applicable. For more detailed information, see also the PCT Applicant's Guide, a publication of WIPO.

In these Notes, "Article", "Rule", and "Section" refer to the provisions of the PCT, the PCT Regulations and the PCT Administrative Instructions respectively.

INSTRUCTIONS CONCERNING AMENDMENTS UNDER ARTICLE 19

The applicant has, after having received the international search report, one opportunity to amend the claims of the international application. It should however be emphasized that, since all parts of the international application (claims, description and drawings) may be amended during the international preliminary examination procedure, there is usually no need to file amendments of the claims under Article 19 except where, e.g. the applicant wants the latter to be published for the purposes of provisional protection or has another reason for amending the claims before international polication. Furthermore, it should be emphasized that provisional protection is available in some States only.

What parts of the international application may be amended?

Under Article 19, only the claims may be amended.

During the international phase, the claims may also be amended (or further amended) under Article 34 before the International Preliminary Examining Authority. The description and drawings may only be amended under Article 34 before the International Examining Authority.

Upon entry into the national phase, all parts of the international application may be amended under Article 28 or, where applicable, Article 41.

When?

Within 2 months from the date of transmittal of the international search report or 16 months from the priority date, whichever time limit expires later. It should be noted, however, that the amendments will be considered as having been received on time if they are received by the International Bureau after the expiration of the applicable time limit but before the completion of the technical preparations for international publication (Rule 46.1).

Where not to file the amendments?

The amendments may only be filed with the International Bureau and not with the receiving Office or the International Searching Authority (Rule 46.2).

Where a demand for international preliminary examination has been lis filed, see below.

How?

Either by cancelling one or more entire claims, by adding one or more new claims or by amending the text of one or more of the claims as filed.

A replacement sheet must be submitted for each sheet of the claims which, on account of an amendment or amendments, differs from the sheet originally filed.

All the claims appearing on a replacement sheet must be numbered in Arabic numerals. Where a claim is cancelled, no renumbering of the other claims is required. In all cases where claims are renumbered, they must be renumbered consecutively (Administrative Instructions, Section 205(b)).

The amendments must be made in the language in which the international application is to be published.

What documents must/may accompany the amendments?

Letter (Section 205(b)):

The amendments must be submitted with a letter.

The letter will not be published with the international application and the amended claims. It should not be confused with the "Statement under Article 19(1)" (see below, under "Statement under Article 19(1)").

The letter must be in English or French, at the choice of the applicant. However, if the language of the international application is English, the letter must be in English; if the language of the international application is French, the letter must be in French.

NOTES TO FORM PCT/ISA/220 (continued)

The letter must indicate the differences between the claims as filed and the claims as amended, it must, in particular, indicate, in connection with each claim appearing in the international application (it being understood that identical indications concerning several claims may be grouped), whether

- (i) the claim is unchanged;
- (ii) the claim is cancelled;
- (iii) the claim is new;
- (iv) the claim replaces one or more claims as filed;
- (v) the claim is the result of the division of a claim as filed.

The following examples illustrate the manner in which amendments must be explained in the accompanying letter:

- [Where originally there were 48 claims and after amendment of some claims there are 51]:
 "Claims 1 to 29, 31, 32, 34, 35, 37 to 48 replaced by amended claims bearing the same numbers; claims 30, 33 and 36 unchanged; new claims 49 to 51 added."
- [Where originally there were 15 claims and after amendment of all claims there are 11]: "Claims 1 to 15 replaced by amended claims 1 to 11."
- [Where originally there were 14 claims and the amendments consist in cancelling some claims and in adding new claims]:
 "Claims 1 to 6 and 14 unchanged; claims 7 to 13 cancelled; new claims 15, 16 and 17 added." or "Claims 7 to 13 cancelled; new claims 15, 16 and 17 added; all other claims unchanged."
- 4. [Where various kinds of amendments are made]: "Claims 1-10 unchanged; claims 11 to 13, 18 and 19 cancelled; claims 14, 15 and 16 replaced by amended claim 14; claim 17 subdivided into amended claims 15, 16 and 17; new claims 20 and 21 added."

"Statement under article 19(1)" (Rule 46.4)

The amendments may be accompanied by a statement explaining the amendments and indicating any impact that such amendments might have on the description and the drawings (which cannot be amended under Article 19(1)).

The statement will be published with the international application and the amended claims.

it must be in the language in which the international appplication is to be published.

It must be brief, not exceeding 500 words if in English or if translated into English.

It should not be confused with and does not replace the letter indicating the differences between the claims as filed and as amended. It must be filed on a separate sheet and must be identified as such by a heading, preferably by using the words "Statement under Article 19(1)."

It may not contain any disparaging comments on the international search report or the relevance of citations contained in that report. Reference to citations, relevant to a given claim, contained in the international search report may be made only in connection with an amendment of that claim.

Consequence if a demand for international preliminary examination has already been filed

If, at the time of filing any amendments under Article 19, a demand for international preliminary examination has already been submitted, the applicant must preferably, at the same time of filing the amendments with the International Bureau, also file a copy of such amendments with the International Preliminary Examining Authority (see Rule 62.2(a), first sentence).

Consequence with regard to translation of the international application for entry into the national phase

The applicant's attention is drawn to the fact that, where upon entry into the national phase, a translation of the claims as amended under Article 19 may have to be furnished to the designated/elected Offices, instead of, or in addition to, the translation of the claims as filed.

For further details on the requirements of each designated/elected Office, see Volume II of the PCT Applicant's Guide.

WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/EP2005/000054

_							
	Вох	No.	I Basis of the opinion				
1.	With the	rega langu	ard to the language , this opinion has been established on the basis of the international application in lage in which it was filed, unless otherwise indicated under this item.				
		langi	opinion has been established on the basis of a translation from the original language into the following uage , which is the language of a translation furnished for the purposes of international search er Rules 12.3 and 23.1(b)).				
2.	With	rega essar	ard to any nucleotide and/or amino acid sequence disclosed in the international application and y to the claimed invention, this opinion has been established on the basis of:				
	a. ty	pe of	material:				
] a	sequence listing				
] ta	able(s) related to the sequence listing				
	b. fo	rmat	of material:				
] in	written format				
] in	computer readable form				
	c. time of filing/furnishing:						
] c	ontained in the international application as filed.				
] fil	ed together with the international application in computer readable form.				
		j fu	rnished subsequently to this Authority for the purposes of search.				
3.		has t copie	Idition, in the case that more than one version or copy of a sequence listing and/or table relating thereto been filed or furnished, the required statements that the information in the subsequent or additional es is identical to that in the application as filed or does not go beyond the application as filed, as opriate, were furnished.				
4.	Addi	tiona	I comments:				
	Вох	No.	ll Priority				
1.		does requi	validity of the priority claim has not been considered because the International Searching Authority not have in its possession a copy of the earlier application whose priority has been claimed or, where ired, a translation of that earlier application. This opinion has nevertheless been established on the mption that the relevant date (Rules 43 <i>bis</i> .1 and 64.1) is the claimed priority date.				
2.		has t	opinion has been established as if no priority had been claimed due to the fact that the priority claim been found invalid (Rules 43 <i>bis.</i> 1 and 64.1). Thus for the purposes of this opinion, the international date indicated above is considered to be the relevant date.				
3.	Addi	tiona	l observations, if necessary:

- D7: US-A-4 606 407 (SHU PAUL) 19 August 1986 (1986-08-19)
- D8: US-A-5 086 089 (SHU PAUL) 4 February 1992 (1992-02-04)
- D9: US-A-4 670 165 (BROWN JAMES M ET AL) 2 June 1987 (1987-06-02)

1. Clarity

The term "A of drilling a well" used in claim 11 is vague and unclear and leaves the reader in doubt as to the meaning of the technical features to which it refers, thereby rendering the definition of the subject-matter of said claim unclear (Article 6 PCT).

2. Novelty

2.1.

Document D1 (see claims 1, 4, 9, 10) discloses a method of stabilising an underground formation surrounding a borehole comprising placing a treatment fluid comprising a crosslinkable polymer (acrylamide copolymers, see claim 4). After placement of the treatment fluid an activator is pumped into the borehole (zirconium lactate or zirconium

acetate, see claims 9, 10, and page 7, lines 13-15). The fluids are pumped sequentially into the borehole, an aqueous spacer fluid may be used (see claim 1).

Consequently, the subject-matter of claims 1-8, 11-18 is not novel (Article 33(1) and 33(2) PCT).

2.2.

Documents D2 - D9 may be used to discuss the novelty of the independent claim 1 as well:

Document D2 discloses the gelation of polyacrylamide solutions withzirconium lactate in underground formations; the polymer, crosslinker and complexing ligand can be injected sequentially.

Document D3 discloses the use of zirconium lactate as a crosslinker to gelate polyacrylamides in borewells.

Document D4 discloses zirconium lactate, used to crosslink arcylamide-containing polymers.

Document D5 discloses the crosslinking of partially hydrolised polyacrylamides with zirconium lactate.

Document D6 discloses the crosllinking of polyacrylamide using zirconium lactate.

Document D7 discloses the crosslinking of a polyacrylamide using chromium ions for stabilising boreholes

Document D8 discloses the polymerisation of acrylamide polymers using a crosslinker and an activator; AI, Cr, and Zr can be used.

Document D9 discloses the polymerisation of acrylamide polymers, cobalt ionsare used as crosslinking agents.

3. Inventive step (Claims 9 and 10)

Document D1 (see claims 1, 4, 9, 10) discloses a method of stabilising an underground formation surrounding a borehole comprising placing a treatment fluid comprising a crosslinkable polymer (acrylamide copolymers, see claim 4). After placement of the treatment fluid an activator is pumped into the borehole (zirconium lactate or zirconium acetate, see claims 9, 10, and page 7, lines 13-15). The fluids are pumped sequentially into the borehole, an aqueous spacer fluid may be used (see claim 1).

The subject-matter of claims 9 and 10 differs from this closest state of the prior art in that a solution of zirconium chloride in seawater is used (claim 9) and that the activator and/or treatment fluid includes colloidal silica (claim 10).

There is no technical effect on file related to these differences. Thus the remaining problem to be solved were to provide alternative methods. However, the skilled person, looking for alternatives, would employ other compounds into the treatment fluids, without the exercise of inventive skill.

Simply adding seawater (claim 9) or colloidal silica (claim 10) to a treatment fluid without any technical effect cannot be the basis for an inventive step.

Hence, without any evidence demonstrating a technical effect arising from the above identified differences over the prior art of the claimed methods an inventive step cannot be acknowledged (Article 33(1) and 33(3) PCT).

4. General remarks

At least some of the objections raised above are such that there appears to be no possibility of overcoming them by amendment.
